Bottom: Robert C. Weaver Federal Building/ HUD Headquarters

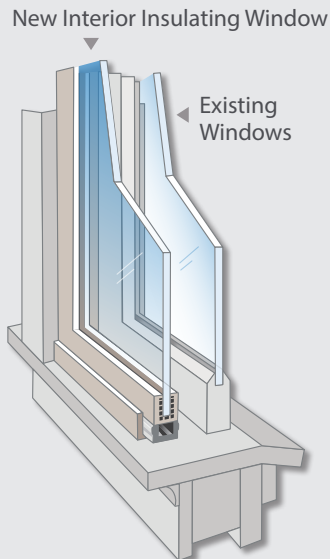

Herbert Hoover Federal Building/ Department of Commerce

Upgrade Your Facility with Interior Insulating Window Solutions

Cost Effective, Long Term Solution to Cut Energy Use

Modernize the performance of your facility while maintaining landmark status. Interior Insulating Windows by Maine Glass help seal leaky building envelopes, create tenant comfort, and quiet the work environment all while cutting energy costs and contributing to a carbon neutral future.

Our window solutions are an alternative to total window replacement. We can upgrade the performance of outdated windows to current efficiency standards, at a fraction of the cost of replacement windows. Payback times are significantly reduced. Installation is straight-forward with minimal downtime or disruption to operations.

Maine Glass has partnered with Grunley Construction, Gilbane Construction, and Honeywell Building Solutions to successfully complete these Federal projects. For more information on our products or to request EnergyPlus™ modeling at no cost to you please contact us at www.maine-glass.com.

Also available with Encapsulated Blinds.
